

Invitation – One-hour Seminar

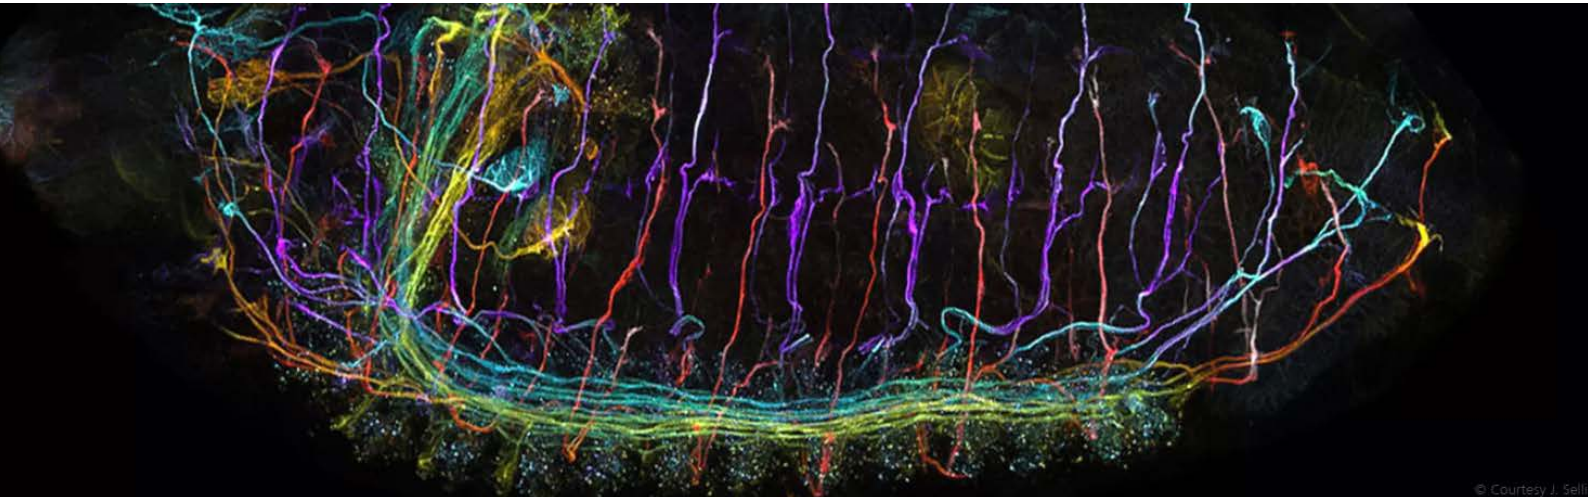

Next generation of Confocal Imaging!

Seeing beyond

October 8, 2019, 14:00 - 15:00

Lund University

Meet the compact workhorse from ZEISS LSM 9 family! Your Compact Confocal for Fast and Gentle Multiplex Imaging.

You are cordially invited to a short coffee and learn seminar in which we would like to introduce you to brand new developments in live cell imaging. Discover the ideal confocal microscope platform for 4D imaging with new ZEISS LSM 900 combined with the new Multiplex mode for parallel pixel acquisition on Airyscan 2.

In less than an hour learn how you can benefit from:

- Faster, better data: the new multiplex mode for parallel pixel acquisition acquires up to 4 superresolution image lines with a high signal-to-noise ratio (SNR) in a single sweep.
- Increased productivity: ZEN imaging software with Smart Setup. Sample Navigator and Direct Processing makes your work more efficient.
- More sensitivity: A light efficient beam path and Airyscan 2 offer a unique combination of gentle super resolution and high SNR.
